

# Medical Milestones and Miracles (A Systematic Tool To Record Your Medical History)

Medical Milestones and Miracles is a very unique, compact, and user friendly medical journal that can be used to assist anyone in organizing and recording their own medical history. The journal is divided into 9 customized sections. Each multi-colored tab contains the title for each section. The contents of the book fits into a three ring customized binder approximately 9 x 6. Simply fill in the blanks to record important information about your family medical tree; doctors and specialist information; medicines used; allergic reactions; appointments; medical test/results; surgeries and hospital stays; and journaling your thoughts and experiences. Having access to all this information in one centrally located place can be very helpful to take with you each time you visit any doctor. It would also be helpful to a friend or relative during an emergency situation to have all of your medical history contained in one place.
