

YOUnique Rap

YOUnique Rap, written by biology professor Irwin Herskowitz, explains how DNA makes a person unique. It tells in rhyme (with illustrations) how DNA information in a chromosome is translated to make proteins. The result is a collection of cells, tissues, and organs that makes an individual one-of-a-kind. YOUnique Rap is intended for students from middle school through college and for adults who feel that the biologic revolution may have left them behind. It is a sequel to his son Joels DOUBLE Talking HELIX Blues (Cold Spring Harbor Laboratory Press, 1993). That song tells How it is that when youre born, youre not a rabbit or an ear of corn! YOUnique Rap provides the next step. Raps Dr. Herskowitz: Each chromosome part that codes a protein/Is a DNA unit called a gene./Because of the way we fit our genes/When were born, were human beings.
