

Adding Biology for Soil and Hydroponic Systems

Simple explanations about how to add biology to any plant growing system makes this book easy-to-read for the general public. Guidelines for conventional, sustainable and organic applications -- whether you are growing indoors in controlled environments and soilless media or outdoors in open fields of soil, this book helps you design your growing systems and incorporate biology into your programs. Basic biology and chemistry of nutrient-cycling and plant growing environments are given, so the mystery is taken out of plant growing.

TABLE OF CONTENTS

CHAPTER 1. INTRODUCTION
Types of Nutrients for Growing Plants
Plants Take Up Nutrients in the Form of Ions
Chelation of Nutrients
Beneficial and Non-Beneficial Microorganisms
The Soil and Hydro Food Web

CHAPTER 2. SYNTHETIC OR INORGANIC SYSTEMS
Chemical Dependency

CHAPTER 3. BIOLOGICAL/ORGANIC SYSTEMS
How the Biology Works
Organic Systems Require Nutrient Cycling
Nutrient Cycling Depends on Biology
Reduction of Salt and Toxic Levels
Essential Benefits of Biological Organic Systems

CHAPTER 4. PLANT GROWING SYSTEMS OUT OF BALANCE
Chemical Answers 50 Years Ago
Biological Alternatives

CHAPTER 5. ROOTS INTERFACE BIOLOGY AND PLANTS
Balance of Beneficial Microorganisms
Essential

CHAPTER 6. TYPES OF MICROORGANISMS
Beneficial
Aerobic Microorganisms
Anaerobic Microorganisms

CHAPTER 7. TYPES OF BENEFICIAL AEROBIC ORGANISMS
Bacteria
Fungi
Mycorrhizal Fungi
Pathogenic Fungi
Saprophytic Fungi
Protozoa
Flagellates
Amoebae
Ciliates
Nematodes
Microarthropods

CHAPTER 8. ENVIRONMENTS FOR MAINTAINING MICROORGANISMS
Dissolved Oxygen
Issues
pH
Issues
Electrical Conductivity

CHAPTER 9.

MICROBES AND PLANTS FORM A SYMBIOTIC RELATIONSHIP Plants Feed Microbes and Microbes Feed Plants Fungal and Bacterial-Dominated Environments Bacterial-Dominated Growing Environments Fungal-Dominated Growing Environments Diversity of Microorganism Community Essential Bacteria and Fungi Retain Nutrients Protozoa and Nematodes Release Food for Plants

CHAPTER 10. INTEGRATING BIOLOGY INTO PLANT GROWING SYSTEMS Pumps Checking Levels of Oxygen, pH and Electrical Conductivity Checking the Biology Examples of Plant Growing Systems Reservoir Systems -- Deep Water Culture, Ebb and Flow and Nutrient Film Drip Irrigation Aeroponics Sustainable Recycling Nutrient Film Technique for Hydroponics

CHAPTER 11. SOURCES OF BENEFICIAL MICROORGANISMS Dormant Microbial Products Single Species Inoculums Trichoderma Pseudomonads Bacillus Dry Microbial Products Worm Casting/Compost or Vermicompost Thermophilic Compost Actively Aerated Compost Teas Leachates, Extracts, Plant and Manure Teas are not Compost Tea Quality of Compost Teas

CHAPTER 12. APPLYING MICROORGANISMS Compost Tea Application Parameters Outside Field Applications of Compost Teas Seasonal Compost Tea Applications Seasonal Approach for Annual or Single-Season Plants General Approach to Applying Tea in Perennial Systems

CHAPTER 13. TESTING FOR BIOLOGICALS Chemical Analysis Biological Analysis Types of Microbiological Tests Test Results Indicating Problems Plant Tissue Testing

CHAPTER 14. RESEARCH ON MICROORGANISMS AND INTERACTIONS Endnotes Resource List About the Authors

PREFACE This notebook is an attempt to provide basic information about adding biology to soil and soilless media whether in outdoor fields or indoor controlled environment hydroponics systems. Once we are

equipped with the knowledge, we can then make intelligent decisions when faced with so many choices of brands and products in the marketplace. Whether we are using synthetic fertilizers/nutrients or sustainable practices, or have converted to organic systems, there is a way to add biology to enhance production, yield and quality. This notebook will provide you with some of the parameters, tools and knowledge so you can integrate biology into your specific growing system.

Adding Biology for Soil and Hydroponic Systems - Growco Buy Adding Biology - For Soil and Hydroponic Systems by (ISBN: 9780979756108) from Amazons Book Store.
