

Waterfall (The Water Crisis Chronicles) (Volume 1)

****Now a complete first novel for The Water Crisis Chronicles.**** The water is gone. The wars have begun. Clean water is a luxury most can no longer afford. Climate change, industrial sabotage, and greed have turned country against country as each one tries to provide for its citizens. Terrorist groups target desalination plants and frustrated governments hunt those who work against them. Rationing, sequestering, and patrolling have become routine at a time when there are too many people and not enough resources. While the world around them disintegrates into chaos, Zach and Vivienne hope that their life in a government-run complex will retain some semblance of normalcy. But when attacks on their water supplies bring war to their sheltered community, they must accept their new fate. Stay and fight or flee and endure a difficult decision with lasting consequences. Will they choose what's safe? Or will they choose to survive?
