

Living in Space (Just Look at...)

Brief text and illustrations present the development of space travel from the launching of the first rockets and satellites to the space shuttle which could make living and working in space a common experience in the near future.

Eating in Space NASA Living in space is not just all work and no play. If you're going to work on the space shuttle for a week or two, it is certainly okay to look out the window, play **Living in Space (Just Look at S): Robin Kerrod: 9780356101828** Sometimes they even just look out the window to take a quick break, daydreaming into space or staring at beautiful Earth far away.
