

## And What Goes Around (April series Book 6)

The nation of Home and their ally Central seem to have bought some safety by moving Mitsubishi 3 from Low Earth Orbit to a halo orbit around L2 beyond the moon. It has added some expense to stay supplied, but it has unexpected advantages too. A little extra distance works just fine when Earth has its own problems. Like April and her close friends Heather and Jeff, Home is growing, developing its own character, and becoming more independent. They really have no choice.
