

# Arid Dune Ecosystems: The Nizzana Sands in the Negev Desert (Ecological Studies)

Sand dune dynamics play a key role in many arid deserts. This volume provides a thorough analysis of a specific sand dune ecosystem, the Nizzana site in the Middle East's Negev Desert. Describing its climate, as well as its geophysical/geochemical soil properties and ecology, this brilliant work draws out the relationships between the sites' ecological and geomorphological processes, based on long-term monitoring, in situ experiments and satellite imagery.

**Arid Dune Ecosystems** Sand dune dynamics plays a key role in many arid deserts.
