

The Cactaceae: Descriptions and Illustrations of Plants of the Cactus Family (Complete in Four Volumes)

Pp. vii, 236, (vii); vii, 240; vii, 255; vii, 318; with 108 fine chromolithograph plates, 4 frontispiece photogravures, 29 full page black-and-white photo-plates, 1120 text-figures (mostly line-drawings). Finely bound in 1/4 tan cloth, spine with black cloth label lettered in gilt and set off by gilt rules, over black cloth covered boards, 4to (11 3/4 x 9 1/4 inches). From the series: The Carnegie Institution of Washington Publication no. 248. This is clearly one of the best books ever written on cacti. The copy offered is the rare first edition of this four volume monograph with vivid chromolithograph color plates. The original fine chromolithographic plates were produced by A. Hoen and Company and are after paintings by Mary E. Eaton, H. A. Wood, Kaka Morita and others. All later editions of this set either had no color plates or poorly produced color-printed plates. See also Nissen 236, Plesch sale 87, Stafleu and Cowan no. 786. Original errata sheet for volume 1 is laid in at the rear of that volume. Faint circular blind stamp of the University of Wyoming at the bottom outer corner of the title page of each volume, the same faint blind stamp appears on page 33 of each volume, no other ownership marks of any kind and no signs of use.
