

Call to Arms (The Star Commandos Series Book 9)

Book 9 from P.M. Griffins Space Commandos Series Sogan, still writhing under the shame of his role in what he considers the Amazonian atrocity and hungering for vengeance against the mastermind of the arms robbery, welcomes Connors announcement that the man has been discovered until he learns their quarry is located not only on her and Karmikels homeworld, but on a farm adjacent to her familys home. They accept the challenging mission, but their investigation proves time consuming, frustrating, and increasingly perilous as several assassination attempts are made against them. Of greater peril still are the planets fearsome storms, which threaten the entire unit with annihilation. Above all is the nagging fear that even if they get the needed evidence, they may well be unable to profit by it. Their on-world opponents are a large company heavily armed and well able to use their weapons. Their enemies in space control a large, deadly fleet. Failure against either party guarantees untold suffering and death for the people of the peaceful agrarian world, yet how can four Commandos and their surplanetary allies hope to thwart such powerful foes?
