

## Canadian Wetlands: Places and People (Intellect Books - Cultural Studies of Natures, Landscapes and Environments)

In *Canadian Wetlands*, Rod Giblett reads the Canadian canon against the grain, critiquing its popular representation of wetlands and proposing alternatives by highlighting the work of recent and contemporary Canadian authors, such as Douglas Lochhead and Harry Thurston, and by entering into dialogue with American writers. The book will engender mutual respect between researchers for the contribution that different disciplinary approaches can and do make to the study and conservation of wetlands internationally.
