

# Childhood and Biopolitics: Climate Change, Life Processes and Human Futures (Studies in Childhood and Youth)

Will the future be a climate disaster? Will biotechnologies bring huge improvements to lifespan? Predictions vary, but children's status as human embodiments of the future puts them at the centre of attempts to shape the world and the discipline of childhood studies can therefore make a critical and creative contribution to future-making.

**Childhood and Biopolitics: Climate Change, Life Processes and Human Futures** N. Lee. So far I have argued that childhood studies needs to adapt to a new For good measure, add in the ageing of the global population that is turning youth into a scarce resource. : **N.
