

Space Cowboys & Indians (Cosmic Cowboys) (Volume 1)

How can the chance of a lifetime go so horribly wrong? Mining Engineer Cole Hudson signed up for NASA astronaut training, but after washing out short of getting his gold wings, he retreats to Alaska where he stakes out a gold claim. When billionaire entrepreneur Duncan Janson offers him an opportunity to join a mining team on an asteroid, Cole jumps at the chance. But nothing is as it seems. Former NASA reject and rival classmate, Tessa Hernandez, is also a member of the team, and from the beginning of the mission test flight, things go wrong. They soon discover they're not the only ones on the asteroid. As they try to escape, they are pulled through a wormhole and back to the early 1800s New Mexico desert where aliens and Apaches may be the least of their problems.
