All three books of the amazing Murder in the Genes trilogy! **SON OF A SERIAL KILLER** Ben Green is a troubled young man, losing his mind and hearing voices. Worse than that, his nightmare is just beginning. Detective Inspector Summers hates dealing with drug addicts, thieves, violent men and women, rapists, child molesters and murderers. She wants to be a doctor in a surgery, saving the lives of the sick. Instead, she deals with the sick and twisted. Finally, she gets handed the case she wants, the reason she joined the force. Her investigations lead Summers closer to Ben, and his involvement to the case slowly becomes clear. **BLOOD OF A SERIAL KILLER** Its only natural for Benny Jones to want to know more about the father he never met. Hes turning eighteen and his doting mother, Eve, can no longer put off answering his questions with the excuse that he is too young to understand. Discovering whose genes he carries, Benny grasps why he has behaved the way he has in recent times and is intrigued to learn more about the darker side of his family. He has many questions, and his grandmother Lily Green, once known as the notorious killer The Phantom, lives on in a mental hospital not far from home and she could supply the answers. The corpses pile up as Benny discovers his purpose in life... **FANATIC...** Martin Day is at breaking point. The loner, ignored and ridiculed for as long as he can remember, looks to his hero for inspiration. Sadly, for those in the near vicinity, the person Martin looks up to most is notorious killer The Phantom.
