

Palar (Volume 1)

The planet Ohl, much like our own, was experiencing an energy crisis. Its main fuel, milla, was in short supply and the inhabitants looked to the stars, to distant planets, to seek a new source. And then came a mysterious anomaly that destroyed Ohl's atmosphere, killing over half the population and essentially killing the planet. Years later, a reporter and a scientist go in search of the anomaly in an adventure that takes them across the universe, encountering different worlds and life forms. Their journey uncovers many secrets that could unravel the very fabric of their own civilization.
