

Dark Days: An Apocalyptic Story

In this story a hacker group gives fair warning that they are about to shut down all computers in the USA. All scoff at the warning as being a totally impossible feat. When the grace period ends the hackers shut down Americas power grid and just using computers they are also able to cause severe physical damage to the entire grid system. This story tells of the aftermath of this very possible event on a small family owned ranch in southwestern Colorado.

When the family learns the electric power will not be coming back on anytime soon they think through the awful effects that will befall all the citizens of this nation. They are very grateful that at least they are together to face the disaster ahead.
