

The Desert

The Desert spans 6 continents to explore 20 of the worlds last great wildernesses and the fascinating range of fauna they support--from the black rhinos of Namibia to the bird species of Chiles Atacama. Featuring stunning images from the worlds top wildlife photographers, this book not only celebrates the unspoiled beauty of desert landscapes, but also focuses on the human dimension: indigenous peoples; controversial issues such as the greening of deserts; the devastation caused by inappropriate mineral extraction; and conservation efforts to protect these fragile environments, so rich in biodiversity.

Desert pictures Pexels Free Stock Photos Deserts cover more than one fifth of the Earths land, and they are found on every continent. Deserts can be classified as hot or cold.
