

Digital Domains: A Decade of Science Fiction & Fantasy

A girl who eats dreams, a woman who chooses the apes, and a barbarian hero rendered as a collage. These are just a few of the people readers first met online thanks to the explosion of webzines. Ellen Datlow, editor of Omni Online, Event Horizon, and SciFiction, led the charge into the brave new world of online science fiction. Digital Domains collects some of the best and most controversial of those stories in print for the first time.
