

Doctor Who: Babblesphere (Destiny of the Doctor #4)(Audio Theater Production)

A brand-new adventure story featuring the fourth Doctor and his companion Romana. The violent, volcanic world of Hephastus is home to a colony of composers, painters, authors, and poets, all striving to create the greatest works of art the universe has ever seen. But in pursuit of their goal, artistic collaboration has been taken a stage too far. When the Doctor and Romana arrive, they discover the colonists have neglected their well-being and their once beautiful habitat has now succumbed to decay. What's more, they are enslaved to the Babble network which occupies their every waking moment. Every thought, however trivial or insignificant, is shared with everyone else, and privacy is now a crime. The colonists are being killed, and the Doctor and Romana begin to suspect that a malevolent intelligence is at work. Written by Jonathan Morris and directed by John Ainsworth.
