

Defending Earth-Searching for Death Feeders

From the bestselling author Saxon Andrew comes a new series, Defending Earth. It is a sequel to the Escape to Earth Series and the first book is titled, Searching for Death Feeders. The war with the Legends is over and the Alliance is at peace. Eighty years have passed since Hensel confronted the Legends and brought the war to an end. However, he knows the Death Feeder he killed vowed that his species would one day come and exterminate his civilization. The Alliance doesn't know what they're up against and scouts have been sent out to find the scope and power of the Feeder Civilization. What is discovered is beyond anything Hensel imagined. Earth has been destroyed once and it appears it can happen again. The action starts and doesn't relent; Earth and its Allies will see that the worst thing they can do is go out Searching for Death Feeders. Excerpt from: Searching for Death Feeders

What's going on? The defenders have learned that the Feeder Warships plan is to fight their way in close to their ships where the Feeder will consume them. They've learned to stay out of the Feeders' psychic range. Do you know how far that is? About five miles. So what's going to happen? Look at your monitor, it's about to happen. Kyle turned to his panel and looked at the monitor. Everyone get out now! Rangor felt the warship jerk multiple times as the escape shuttles blasted out of the large landing bay. He watched one of the huge enemy warships turn in his direction and he started pressing buttons on his panel activating every laser, missile and bomb on board his ship. He turned his ship nose on to the oncoming enemy ship and set the auto-pilot to lock on the oncoming monster. He hit the thruster controls and jumped out of his chair and ran off the bridge toward the rear of the large ship. He sprinted at his fastest speed and heard the vacuum ports slamming behind him as he ran through them. He smiled as he felt his mind being invaded by

a powerful telepath. Then, he stopped and turned back toward the bridge. But each of the ports would have to be opened manually and there was no way that would be done in time to stop what was happening. The Feeder jumped up out of his chair, EVADE THAT SHIP!! ITS GOING TO RAM US!!! The Feeder hit the stardrive control and waited for it to surround the ship. The large green warship came flashing in at incredible speed and all the Feeder Warship could do was to turn broadside to the oncoming ship coming at it. The stardrive finally activated just after the defenders warship hit the giant dead center. The explosion ripped out and the shockwave blew into the giant transport that was passing the exploded Feeder Ship. It penetrated the transports force field and blew into the transports landing bay, exploding every lander and all the weapons on board them. The transport went up like a giant firecracker. The surviving Feeder Warship disappeared as two of the defender ships flashed in on it.
