

Evidence for the Personhood of Chimpanzees: AN EVOLUTIONARY MANIFESTO FOR CHIMPANZEE RIGHTS IN THE TWENTY-FIRST CENTURY

Evidence for the Personhood of Chimpanzees is an essay on the homologous anatomy, culture, intelligence, and emotions of chimpanzees based on Darwinian continuity. Natural personhood is a suite of mental, emotional, and behavioral traits that only a self-aware animal possesses. Chimpanzees are not property; they are persons.
