Hidden deep in the southwest desert, away from civilization, a top-secret, high-tech research facility is experimenting with many forbidden things. Things that even most of the employees don't know about. The task of protecting the compound and keeping its various experiments under wraps is Director Raze, Head of Security for Diotech Corporation. But when one of those experiments manages to escape and Raze is to blame, he must figure out a way to recover the missing property without exposing himself. In a place where minds can be manipulated and secrets can be wiped from existence, how far will one man go to keep his own secrets buried?
