

Fractal Paisleys

You can try to escape from the mundane, or with the help of Paul Di Filippo, you can take a brief, meaningful break from it. In the vein of George Saunders or Michael Chabon, Di Filippo uses the tools of science fiction and the surreal to take a deep, richly felt look at humanity. His brand of funny, quirky, thoughtful, fast?moving, heart?warming, brain?bending stories exists across the entire spectrum of the fantastic from hard science fiction to satire to fantasy and on to horror, delivering a riotously entertaining string of modern fables and stories from tomorrow, now and anytime. After you read Paul Di Filippo, you will no longer see everyday life quite the same. Fractal Paisleys contains ten funny, irreverent, and sexy stories, including two not previously published before the original release of this book. You will learn the real reason for the disappearance of the dinosaurs, how John Lennon found inspiration for his songs, and how the Lil Bear Bar in Providence, Rhode Island (the authors hometown, by the way not a coincidence) ended up with a talking moose head on its wall. You will also learn what a fascinating writer Di Filippo is and want more. That's why a dozen of his titles are being republished. To start with, at least.
