

Looking Through Lace (Volume 1)

As the only woman on the first contact team, xenolinguist Toni Donato expected her assignment on Christmas would be to analyze the secret womens language -- but then the chief linguist begins to sabotage her work. What is behind it? Why do the men and women have separate languages in the first place? What Toni learns turns everything she thought they knew on its head. Originally published in Asimovs in 2003, Looking Through Lace was a finalist for the Tiptree and Sturgeon awards. The Italian translation won the Premio Italia for best work of speculative fiction in translation in 2007.
