

# Global Tectonic Zones, Supercontinent Formation and Disposal: Proceedings of the 30th International Geological Congress, Volume 6

The 30th International Geological Congress was held in Beijing, China in August 1997. Leading scientists convened to present their findings and views to the international geological research community. Volume 6 of 26 focuses on global tectonic zones and supercontinent formation. All articles in the proceedings have been refereed and keynote papers have been included in Volume 1. These proceedings aim to present a view of contemporary geology and should be of interest to researchers in the geological sciences.
