

## In Defence of the Empire

Victorian London has been transformed by Henry Babbages perfection of his fathers Analytical Engine. Fuelled by these computing machines, science and engineering have taken giant leaps forward; horses and manual labour have been all but replaced by the limitless power of steam, and Britains armies have become practically invincible thanks to the introduction of mechanical leviathans. With new and more fantastic inventions being produced daily, the citizens of the Empire struggle to keep up with the accelerating pace of change. Indeed, there are many who oppose the relentless march of Progress, and the gentlemen clubs and drinking dens of London abound with talk of change; be it evolution or revolution. When an outspoken MP is found brutally murdered, Scotland Yard enlists the assistance of the adventuress Lady Rose Buchanan and her scientist husband Professor James. Accompanied by the professors mysterious assistant Mr. Lazarus, the couple begin to investigate the strange occult phenomenon that surrounded the victims death, and quickly find themselves embroiled in a sinister plot to overthrow the monarchy and bring down the empire.
