

Lavender - An Entwined Adventure In Science & Spirit

2014 WINNER! NATIONAL INDIES EXCELLENCE AWARD NEW AGE FICTION Inspired by a true story, LAVENDER is a fable for our times. Following the relentless quest of Penelope, an unschooled, unscientific and unexpected vehicle for higher truths, LAVENDER engages you in decoding dream-encrypted riddles and clues to a monolithic puzzle. As the hundreds of threads in Penelopes dreams connect, we discover how intuition guided by spirituality can reveal startling scientific fact. The choice emerges between healing the earth or ignoring Penelopes tormented warning of our potential demise. Wound around a long-term study in dreaming consciousness, LAVENDER brings David Bohms quantum theory of cosmic unity to life through aspects of fragmentation, timelessness, interconnectedness and wholeness. As a guide to the waking-dreaming mind, LAVENDER reveals: the transformational potential in long-term dream journaling; paranormal aspects inherent in dreaming; and how dreamers can crack their own code. LAVENDER is charged with mystery and suspense, neither science fiction nor earthbound whodunit, but a Who-Sent-It cosmological conundrum with outcomes supported by todays headlines.
