

Evilution

The Evilution Series is comprised of The Sacred Protocol, Divine Extinction and The Ice Wars of Dominia. The Sacred Protocol is an alternate history, sci-fi crime thriller. Two pivotal events in history set the scene for the inevitable collapse of the internet. The new SACRED system seems to be linked with a number of mysterious deaths of protestors. It becomes a race against time to prevent global implications of unimaginable consequence. The investigating bodies must cooperate as zero point approaches. Divine Extinction takes the story on. They thought they had engineered temporary respite from the threat to humanity. Four years was a convincing period of inactivity. The vigil was suddenly invaded by fear of a completely different danger, which hovered over the species. The plot follows the pendulum of breakthrough and setback in dealing with the impending disaster. Contemplation of the consequences is bad enough without the emergence of a deadline. The time afforded to make a difference was shrinking fast. The Ice Wars of Dominia begins over one hundred years after the conclusion of Divine Extinction. Due to the advance of a new ice age, the world is a very different place. The surviving humans are a mix of nomadic and agrarian cultures. The habitable space is still shrinking under the ice, and conflict between the five small nations becomes inevitable. With only mediaeval technology available, the scramble for the spoils of war is complicated by a species observing from orbit.
