

Memoir of an Alien Princess (A Nick Blade Companion Novel Book 1)

Verdera is a planet that consumes the careless, the inexperienced, the weak. Small, confused, and ill-equipped for survival, DUST, is thrown into the vicious chaos of life on Verdera. The oldest of five, she must protect her siblings from the physical threats lurking around every tree, bush and rock. Next in line to rule one of the most technologically advanced civilizations in the galaxy, her father orders her to do her duty and select a mate from those deemed suitable by law. It is a choice that condemns her to a loveless pairing and a life of servitude for the good of her race unless she can use her unique abilities to find another way. The precious, adventurous Princess!! It is NOT easy to create a fascinating alien world, so that it is as original as it is unique. Kendrick managed to do it in Memoirs of the Alien Princess. Great read, and plenty of brilliant ideas for a movie! The species of the princess? Windalfluff. Now, thats some powerful imagination at work.
