

# Mobius

In 2969 the Dimensional Gateway is built. Mysterious Obelisks arrive on Earth. Humankind faces Oblivion! Theron Mobius has worked his entire life on a Dimensional Gateway that will propel humankind into a new era of space travel. When its sabotaged by a mysterious entity, he uncovers a plot against humanity that's been underway for millennia. Theron is driven against all odds to stop the entity, only to discover he's an integral part of the entity's sinister plan. Together with a small group of travelers, he must journey across galaxies in search of an ancient Guardian of the universe. If he fails, humankind will face oblivion. Truly epic space opera, on a Peter Hamilton type scale, makes Mobius our Book of the Week. --SCIFI365.NET Vale has written a true space opera, with a dizzying number of characters and concepts. --BestThrillers.com...a boldly expansive space adventure. --scifi.indiebookreviews.com A fanciful sci-fi novel... --Kirkus Reviews
