

Shadows (Ultrahumans Book 2)

Once upon a time, Andrea Morgan was a normal, everyday girl. Let's start again. Once upon a time, Andrea Morgan was a fairly normal girl with quite remarkable reflexes, who could teleport from shadow to shadow. Then her brother was killed and she became Twilight, the stealthy, black-clad nemesis of organised crime in New Millennium City. Then she met Cygnus, almost her exact opposite, but they worked well together: Cygnus in the light and Twilight in the darkness. But there is something in the darkness which is stalking Andrea Morgan. It has been there, in the shadows, since mankind sat around the fires on the plains of Africa and wondered what was out there beyond the firelight. It wants Andrea dead, but sometimes when you die that's just the start of your problems. Let's start again. Maybe there was never a time when Andrea Morgan was a normal girl.
