

Out of Gas

Mark and Kelly Turner are what many call "average Americans". Their childhoods were spent in small Texas towns with summers at their respected grandparent's farms. Like most teenagers growing up in small towns they could not wait to flee after graduation for big cities and successful careers. Careers were launched, the big house on the golf course bought, luxury cars leased, and fancy vacations taken. They had it all until a global fuel shortage started causing Mark to wonder about his job and the financial future of his family. Follow Mark and Kelly as they learn about global finances, hidden agendas, and the cover-up of the upcoming global fuel shortage and severe economic depression it will create. Follow the Turners as they plan their strategy to voluntarily move from an upper middle-class lifestyle to a self-sustaining lifestyle on an Oklahoma farm before it is too late. Learn with them as they learn the skills needed to live on a small farm, raise their own food, and prepare for a global economic depression. A depression on a scale never seen by mankind before.
