A century after an apocalyptic war devastates the planet and reduces all countries to smouldering ruins, Melbourne's remnant population huddles behind twelve-foot walls. But are these walls for protection from the Skel savages who roam the city's ruins, or to imprison the people and subject them to archaic rules enforced by the ruthless Custodians. Mutants aren't tolerated, you can't leave the town, women should be seen and not heard, and if you break the law, you'll be sentenced to hard labour or swiftly executed. Ethan Jones is the leader of a foraging team whose skills are paramount to the community's survival. His success is due to a secret he harbours and the Custodians are growing suspicious, for his mere existence is a violation. When Ethan's team rescues a Japanese girl from the Skel, he brings her back with them. He finds her unlike anyone he's ever met and her steely determination completely captivates him. The feelings are mutual but she breaks the town's rigid conventions in her attempts to get to know him, endangering them both. Making matters worse, the Skel have intensified their attacks on foraging teams and are infesting Melbourne's ruins in ever-greater numbers. Keeping his secret, uncovering the girl's true intentions and trying to stop mass annihilation all vie for Ethan's attention. And if he fails, not only his life, but the lives of all, are at stake. The main thing that I really really liked about Forager was that I was constantly taken by surprise. -- From Trips Down Imagination Road. I love that everyone in Ethan's home is one way, while the Japanese girl he saves is almost the exact opposite. Women are to be seen and not heard, but this girl has guts like you wouldn't believe. -- From Journey with Books
