

Selected Works of R.D. Laing 7 Vol set (POD)

This set reprints seven of Laings major works, originally published between 1960 and 1971 and out of print for many years. Laing was an existential psychiatrist who offered a radical critique of abnormal behaviour and social and medical models for its treatment. He was critical of the extent to which psychoanalytic concepts may conceal or distort human experience and of the tendency to label the patient sick as opposed to looking at sickness in the patients family or in society. It was Laing who argued that schizophrenia is not an illness but a label for another kind of problematic experience and behaviour. Laings ideas have been particularly popular among those who object to the hypocrisy of society and its treatment of those considered to be abnormal. Available also as individual volumes, this set offers the ideal opportunity to replace missing or damaged volumes. Laings works included in this set are:
