

Shells / Muscheln / Coquillages: Conchology, or The Natural History of Sea, Freshwater, Terrestrial and Fossil Shells (English, French and German Edition)

Antoine Joseph DeZallier d'Argenville (1680-1765) was so bewitched by seashells that he authored one of the world's most spectacular books dedicated to seashells. His *La Conchyliologie ou Histoire Naturelle des Coquilles de Mer, d'Eau Douce, Terrestres et Fossiles*, published in Paris in 1780, was a summa of contemporary knowledge in the complementary fields of mineralogy and conchology, and was so popular as to turn the study of natural history into a fad in Paris. A botanist and art lover, DeZallier drafted life-size drawings of the seashells, hand-coloring them in rococo style and even using a mirror to illustrate them to best effect. TASCHEN's complete reprint of these 80 splendid hand-colored copper engraved plates, distinguished by their vivid colors and vast selection of rare, beautiful species, is taken from one of the finest original copies.

3836511118 - Shells / Muscheln / Coquillages: Conchology, or the or the Natural history of the Sea, Freshwater, Terrestrial and Fossil Shells 1780: Near FINE hardback (no dustwrapper). Text in English, German & French.
