

## Silo Saga: MURDER in Silo 102 (Kindle Worlds Novella)

When people start dying in larger than normal numbers, the coroner can only list UNKNOWN CAUSE as the reason for the deaths. The deaths are not even investigated until a clerk points them out to the Director of Security, and even then they are dismissed as occurring naturally or accidentally since there had never been a murder in Silo 102 since its beginning. But when the deaths continue to occur defying coincidence, the Director and his assistant begin to have some suspicions. Slowly, suspects begin to emerge but a motive and cause of death cannot be found. Follow along as the Silo society is faced with finding a killer right in their midst and then having to figure out how to deal with him or her...if a killer actually exists. Is this an overreaction to people dying young, or is there actually a murderer so clever as to get away with his crime? And are the suspects simply victims of a witch hunt by people who are easily led to believe something that isn't true?
