

How to diagnose and treat skull fractures

How to diagnose and treat skull fractures As a surgery or emergency medicine resident evaluating a patient, you will spend a good portion of your training managing trauma patients. A very common scenario is a patient who has fallen onto their head, or who has been hit on the head, who now presents with a scalp bruise. How do you diagnose a skull fracture in this patient? And once you've made the diagnosis, how do you manage it?
