

## Connect Access Card for Transformations: Women, Gender and Psychology

This groundbreaking text presents a framework for understanding how the lives of all people are shaped by gender. Instead of presenting gender as a collection of individual traits, Transformations presents gender as a social system that is used to categorize people and is linked to power and status. Mary Crawford's readable and lively style, and her presentation of a balance of classic and cutting-edge research, provide an engaging overview of the psychology of women and gender. Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more engaging and effective. It provides tools that make assessment easier, learning more engaging, and studying more efficient. For instance, Connect contains SmartBook, the first and only adaptive reading experience available for the higher education market. Powered by the intelligent and adaptive LearnSmart engine, SmartBook facilitates the reading process by identifying what content a student knows and doesn't know. As a student reads Transformations, the material continuously adapts to ensure that he or she is focused on the content most crucial to closing specific knowledge gaps.
