

Colony

In the Future, Everything is Different. But Nothing Has Changed. The Earth has been poisoned by pollution, choked by overpopulation, and ravaged by the mindless greed of power-hungry corporations. A fragile peace is threatened by landless revolutionaries and global anarchy seems imminent. Yet a single ray of hope remains... Island One is a celestial utopia, and David Adams is its most perfect creation: a man with a brain as advanced as any computer and a body free of human frailties. But David is a prisoner, a captive of the colony that created him, destined to spend the days of his life in an island-sized cylinder that circles a doomed and desperate home planet. Thousands of miles below him, a world trembles; its people cringe in terror and despair in anticipation of an impending apocalypse. And as Earth's boundaries, fate has cast one extraordinary human in the role of savior. For David Adams has a plan, one that will ultimately ensure the salvation of his species... or its annihilation.

ABOUT THE AUTHOR Ben Bova, six-time Hugo Award winner and author of more than eighty futuristic novels and nonfiction books, has been involved in science and high technology since the beginning of the space program. Formerly president of Science-fiction and Fantasy Writers of America and President Emeritus of the National Space Society, Bova is a frequent commentator on radio and television, and a popular lecturer. He has also been an editor and an executive in the aerospace industry. His novels, such as *Mars*, *The Exiles Trilogy*, and *The Grand Tour* series, combine romance, adventure, and scientific accuracy to explore the impact of technological developments on individuals and on society as a whole. His nonfiction books, such as *Welcome to Moonbase* and *Assured Survival*, show how modern technology can be used to solve economic, social and political

problems. Bova has taught science fiction writing at Harvard University and at the Hayden Planetarium in New York City. He lectures regularly on topics dealing with the space program, energy, the craft of writing, and the art of predicting the future. His audiences have included the National Geographic Society, government and corporate executive groups. He has worked with film makers and television producers, such as Woody Allen, George Lucas and Gene Roddenberry. Bova has appeared on hundreds of radio and television broadcasts. He was a regular guest on CBS Morning News, and has appeared frequently on Good Morning America and the Today show. Hurry, don't let humanity die out -- lift off for the colony of Island One immediately!
