

Exploring Science / The Oceans Around Us / Wonders of Water (National Geographic Reading Expeditions)

This includes 3 pamphlets from the National Geographic Earth Science series: Wonders of Water, The Oceans Around Us and Exploring Space. In the Reading Expeditions Earth Science Series-Wonders of Water, you will explore many fascinating aspects of planet Earth-from its inner core to the depths of its oceans to its ever changing surface and its place in the universe. Understand the world's finite supply of water as it circulates through the water cycle. See how increasing the usable supply has both risks and benefits. Learn how water works for us and how we can conserve it. In the Reading Expeditions Earth Science Series-The Oceans Around Us, you will explore many fascinating aspects of planet Earth- from its inner core, to the depths of its oceans to its ever changing surface, and its place in the universe. In this book, students follow a sea turtle's adventures and learn about the features of the oceans and the ocean floor. They will meet human divers and deep-sea creatures along the way. In the Reading Expeditions Earth Science Series-Exploring Space, you will explore many fascinating aspects of planet Earth-from its inner core to the depths of its oceans, to its ever changing surface and its place in the universe. Take a voyage of discovery from the ancient Greeks to Galileo to astronauts today. Find out how technology, skill, and imagination help us explore our solar system. This makes for great independent reading. Home educators can use this for book reports and elective reading.
