This early work by Sigmund Freud was originally published in 1895 and we are now republishing it with a brand new introductory biography. Studies on Hysteria is an work containing case studies and treatment methods for hysteria. Sigismund Schlomo Freud was born on 6th May 1856, in the Moravian town of Pribor, now part of the Czech Republic. He studied a variety of subjects, including philosophy, physiology, and zoology, graduating with an MD in 1881. He inspired much discussion on the wealth of theories he produced and the reactions to his works began a century of great psychological investigation.
