

The Herring, Its Natural History and National Importance (Classic Reprint)

The Eoyal Scottish Society of Arts having offered a medal for the best essay On the Natural History of the Herring, considered in connection with its Visits on the Scottish Coast, the authors attention was directed to the question, and he wrote a short paper on the subject which obtained the medal. This success encouraged him to attempt something more popular and elaborate; and although interrupted by other avocations, he steadily directed his attention to the work which he now brings before the public. In endeavouring to obtain as much information as possible, he has frequently visited the fisheries on the West Coast, the East Coast, Cornwall and the English Channel, and the coasts of Ireland. He has been on board several of the Dutch fishing-busses, and went to their head-quarters at Vlaardingen and Maassluis ;he visited the shores of the Baltic on both sides, and the shores of the German Ocean; resided for some time in Norway, and visited the principal fishing districts in that country.(Typographical errors above are due to OCR software and dont occur in the book.)About the Publisher Forgotten Books is a publisher of historical writings, such as: Philosophy, Classics, Science, Religion, History, Folklore and Mythology.Forgotten Books Classic Reprint Series utilizes the latest technology to regenerate facsimiles of historically important writings.
