The Last Sunset (Preppers Fiction): The Dark Star is Coming and Death Lingers in its Shadow The year is 2040 and the human race may be doomed when a massive meteor called The Dark Star is headed directly towards the planet. The wealthy and important people need not worry because they have all been given the opportunity to travel to the lunar base via space shuttles before the meteor is scheduled to hit. Darius Downey is not one of the lucky few who will be given the privilege to escape the earth. Darius must devise his own survival plan and being a clever, high end criminal defence lawyer in Chicago, he believes he can find a way. Lance Bitcow is a billionaire who has just funded a project that will hopefully destroy The Dark Star. He invested \$20 billion in a high-tech laser that will destroy the meteor well before it hits the earth. But when Lance gets in some legal trouble after being accused of rape and attempted murder, he needs a favour from somebody like Darius Downey. Can Darius help Lance escape the grasps of the legal system and earn himself a spot on a space shuttle headed for the lunar base? Will The Dark Star destroy the planet or will it be vaporized before it strikes? This book is packed full of non-stop action that will have you dying to turn the page. This is the first book of The Last Sunset trilogy, get ready to be blown away.
