

The Earth-Mars Chronicles: Hope for Humanity

The Earth-Mars Chronicles are the closest thing to being there this side of The Martian, which is, by the way, one of the top 10 books I have read in the past 63 years. I hope the movie does it justice. Anyway, I wrote The Chronicles in order to fill in a gap in modern day science fiction. The unbounded gap involves the entire solar system as far as venue is concerned, and the prose of Heinlein, Clarke, Stine, and other pioneers as far as style is concerned. I have been humbled that some readers have sensed these things and have mentioned them in their reviews. The Chronicles follows the lives of ordinary and extraordinary people as they first fight to survive (both as a species and as a civilization) the interstellar onslaught of asteroid and comet-like bodies (Volume 1), and then to establish long-term survival settlements on Mars (Volume 2). Volume 3 (Part 1 and Part 2 are available, Part 3 is in process) moves the story of Mars and its new generations of Mars-born Settlers into the fight for recognition, self-sustainment, and independence, culminating with the collapse of civilization on Earth. The Martian Settlers become the keepers of the light of knowledge and history, and Mars becomes the Haven for Humanity. Volume 4, Homecoming for Humanity (in planning), will delve into the problems confronting the future generations on Mars who strive to assist those warrens of humanity on Earth laboring to protect and maintain conclaves of civilization in a world gone mad. There is substantial benefit that accrues to a writer (that would be me) who has defined a universe of planets, populations, space infrastructure, transportation, etc. These elements provide the stage for new characters and new adventures and/or challenges. I took advantage of that situation when penning Butterscotch Dawn (available now as e-book or paperback) and Martian Sniper (Pre-Publication special of \$0.99 for

Kindle until 1 October). Butterscotch Dawn is a short novel of adventure and survival as a two-person team attempt to get home from the North Pole after the mother of all dust storms settles in all over Mars. Speaking of mothers, one of the crew is going to be one, except she did not know it when they left Bradbury Settlement. I think it is a very warm but gut wrenching adventure. Martian Sniper is the first book in a series titled A War for Cousins. The time frame is about 200 years after the establishment of NewHome, the first settlement on Mars as described in Volumes 2 and 3 of The Chronicles. Although the population of Mars numbers less than one million, the planet and its population have substantial influence over economic and social recovery on Earth. This rubs a number of people on Earth the wrong way while an internal struggle takes place on Mars for control of the planets resources. Paris Bresneva never wanted any responsibility beyond selecting the evenings beer and finding a woman who would put up with him for a while. His life changed rather quickly. Many others would, also. So settle in with any of these stories and hang on for the ride. The future of Mars has hardly begun! Regards, Gerald W. Driggers
