

The Ultimate Guide to Vegetable Gardening for Beginners

Want to concentrate on specific vegetables that are easy to grow and are favourites in most cook books? The author would like to stress the importance of growing the right type and mix of veggies. This way you get a better crop, and useful veggies that usually go hand in hand with each other. Dont try to do too much too soon. Dont try to start planting when its too cold outside. The lowest soil temperature for planting is 40 degrees Fahrenheit. The best soil temperature is around 50 degrees to 60 degrees. Every successful farmer/gardener has a mentality that considers nature first, before spur of the moment decisions. As an added bonus, planting veggies will turn you into a very observant person.
