

Mediators of Sepsis (Update in Intensive Care and Emergency Medicine) (Volume 16)

This volume contains contributions by well-known scientists and clinicians in the fields of microbiology, infectious diseases, physiology, internal medicine, surgery, anaesthesiology, and intensive care medicine. It provides an up-to-date overview of the mediators and pathophysiology of sepsis and septic shock as well as the latest therapeutic approaches.

Endotoxin Administration to Humans: A Model of Inflammatory Volume 18 of the series Update in Intensive Care and Emergency Medicine pp release of endogenous humoral mediators in response to bacterial products, **The Orchestra of Mediators in the Pathogenesis of Septic Shock: A** Medicine.
