

## Visions of Liberty

The Future of Freedom as Explored by Top Science Fiction Writers in a New Volume of All Original Stories. As Thomas Jefferson put it, That government is best which governs least. And, as Will Rogers wryly quipped, Were lucky we dont get all the government we pay for! In Visions of Liberty, ten top science fiction writers, several of them Hugo or Nebula award-winners, create ten very different futures in which Government does not exist and explore the possibilities of a truly free society. Among the roster: Hugo winner and Grand Master Jack Williamson; Michael Resnick, winner of four Hugos and a Nebula, and author of the international bestseller, Santiago; Michael A. Stackpole, author of eight New York Times best sellers; best-selling novelist Jane Lindskold, New York Times best-selling author James P. Hogan, Robert J. Sawyer, winner of the Nebula Award for best novel of the year; and more. As threats to liberty arise in our own time, so it will be in the future. In this volume, a stellar cast of SF luminaries consider how the future might be different and how freedom might truly triumph. At the publishers request, this title is sold without DRM (DRM Rights Management).
