

The Body at Auercliff

Well bury her so deep, even her ghost will have a mouth full of dirt! When Rebecca Wallace arrives at Auercliff to check on her aged aunt, she's in for a shock. Her aunt's mind is crumbling, and the old woman refuses to let Rebecca stay overnight. And just as she thinks she's starting to understand the truth, Rebecca makes a horrifying discovery in one of the houses many spare rooms. A dead body. A woman. Old and rotten. And her aunt insists she has no idea where it came from. The truth lies buried in the past. For generations, the occupants of Auercliff have been tormented by the repercussions of a horrific secret. And somehow everything seems to be centered upon the mausoleum in the houses ground, where every member of the family is entombed once they die. Whose body was left to rot in one of the houses rooms? Why have successive generations of the family been plagued by a persistent scratching sound? And what really happened to Rebecca many years ago, when she found herself locked inside the Auercliff mausoleum? *The Body at Auercliff* is a horror story about a family and a house, and about the refusal of the past to stay buried.
